

**VOLUNTARY REMEDIATION PROGRAM  
DEPARTMENT OF ENVIRONMENTAL MANAGEMENT**

**PROJECT SUMMARY**

<b>Site Name:</b>	Tuthill Corporation, Fill Rite Division
<b>Applicant's Name:</b>	Tuthill Corporation
<b>Site Location:</b>	4204 Ferguson Road Fort Wayne, IN Allen County
<b>VRP Site Number:</b>	6980602
<b>Project Manager:</b>	Damon Ridley
<b>Date Application Received:</b>	June, 1998
<b>Date Project Completed:</b>	November, 1999
<b>Project Duration:</b>	1 year, 5 month
<b>Contaminant Group(s):</b>	Volatile Organic Compounds (VOCs), Petroleum
<b>Media Cleaned Up:</b>	Surface Soil, Subsurface Soil
<b>Cleanup Goals Achieved:</b>	Tier II Nonresidential
<b>Deed/Land Use Restrictions:</b>	Nonresidential

**Project Description:** This facility manufactured various types of mechanical and electrical pumps from 1960 to 1986. The contamination issues were the results of a trichloroethene spill in 1986 and an underground storage tank (UST) removal in 1980.

The company conducted a subsurface investigation to determine the extent of contamination associated with the spill and tank removal. The results identified subsurface contamination above the Nonresidential Tier II cleanup standards and determined that the extent of the contamination was limited to property boundaries, and more specifically to the tank and spill areas.

Site remediation involved excavation and disposal of approximately 1,500 tons of contaminated soil. Confirmatory sampling determined that all Tier II Nonresidential standards had been met.
